PROFILE

I am a Computer Science student at Addis Ababa University with a strong interest in software and web development. I enjoy building practical applications and learning how different parts of a system work together. I have experience working with React, JavaScript, Node.js, Express, PHP, Python, and MySQL, and I am comfortable using Git and GitHub for managing projects.Through my academic work and personal projects, I have gained practical experience in frontend and backend development, APIs, databases, and building user-friendly applications. I am currently looking for opportunities where I can improve my skills, gain real-world experience, and contribute to a development team.

EDUCATION

Addis Ababa University
BSc in Computer Science
Expected Graduation: **2027**
Relevant coursework includes Programming, Object-Oriented Programming, Operating Systems, Web Development, Computer Graphics,Data structure and Algorithm,Networking, Mobile Computing, and other Computer
Science subjects.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, PHP
Frontend: React, HTML5, CSS3, Vite
Backend: Node.js, Express.js, PHP, REST APIs
Databases: MySQL
Tools: Git, GitHub, VS Code

PROJECTS

Hena Electronics — Full-Stack Web Application
A web application developed for an electronics business to manage and display its products online.

- Built the frontend using React and Vite.
- Developed backend APIs using Node.js and Express.js.
- Connected the application to a MySQL database.
- Added product management, product details, categories, promotions, and product availability.
- Added support for multiple product images.
- Built an admin dashboard for managing products and promotions.

Technologies: React, Vite, JavaScript, Node.js, Express.js, MySQL
GitHub: https://github.com/Getaneh-12/hena-electronics

JobTrack — Job Application Management System
A React application I built to help users organize and keep track of their job applications.

- Built the application using React and Vite.
- Added pages for managing job applications and viewing application details.
- Added interview scheduling and reminders.
- Created a dashboard to make job-search activities easier to organize.
- Used browser local storage to save application, interview, and reminder information.
- Designed the interface to be simple and easy to use.

Technologies: React, Vite, JavaScript, CSS, Local Storage
GitHub: https://github.com/Getaneh-12/Jobtrack
Live Demo: https://getaneh-12.github.io/Jobtrack/

Weather App — Weather Information Application
A simple weather application built to practice working with APIs and frontend development.

- Built the application using JavaScript, HTML, and CSS.

Added city search functionality.
Connected the application to a weather API.
Displayed current weather information and forecast data.
Created a responsive interface that works across different screen sizes.

Technologies: JavaScript, HTML5, CSS3, Weather API
GitHub: https://github.com/Getaneh-12/Weather_app
Live Demo: https://getaneh-12.github.io/Weather_app/

CERTIFICATION
Developing Back-End Apps with Node.js and Express — Coursera
Certificate: https://www.coursera.org/account/accomplishments/verify/FDULLDQ234EW

LANGUAGES
Amharic: Native
English: Working Proficiency

INTERESTS
Software Development, Web Development, Mobile Application Development, Problem Solving, and Learning New Technologies
